## Monthly Update

Negatively affecting the unit price during the month of January was the 3.53% increase in the value of the Australian dollar against the USD dollar from US\$0.7822 to US\$0.8098.

Positively affecting the Fund's unit price during the month of January was a recalculation of the Fund's future US corporate tax liabilities as a result of the reduction in the US corporate tax rate from 35% to 21%, effective 1 January 2018.

This recalculation, based off the Fund's Q3 Net Asset Values (still the most current released), resulted in a US\$267,222 reduction in the Fund's hypothetical US tax liability, which increased NAV by the same amount.

Unit Prices are reflecting the Q3 Underlying Fund Net Asset Values as at 30 September 2017. Underlying Fund performance since inception is summarised below which is US Dollar denominated and thus excludes the impact of currency movements and is in line with the Underlying Fund's target returns and is summarised below:
